

EQ2 Supports Another Single Sign-On Application for the HEMS CMMS

Camarillo, CA and Charlotte, NC, September 1, 2022 – [EQ2, LLC](#) has released an additional Single Sign-On (SSO) service for the company’s “HEMS” CMMS software. Since its hospital clients have numerous applications their users frequently access, those clients want to limit the number of logons required to use these applications. SAML 2.0 (CyberArk, Shibboleth) is used by many hospitals and is now supported in HEMS. Other SSO services EQ2 HEMS supports include: OpenID Connect (OIDC) (including Azure AD, CyberArk), ADFS with WS-Fed (including SecureAuth, and Windows ADFS).

Since HEMS is built on its own platform, EQ2 can support many different types of single sign-on services and will continue to add new ones as requested by new or existing clients.

About EQ2

The EQ2 HEMS CMMS software was developed for and is sold exclusively to hospitals for managing their medical and facility assets. HEMS is available as a SaaS subscription service or for license installs on hospital-owned servers. EQ2 LLC has offices in Camarillo, CA and in Charlotte, NC. See www.eq2llc.com, [LinkedIn](#), or [YouTube](#) for more info.
